

Theory and Reviews

A Sensitive, Flexible, Dual-Mode Evaporative Light Scattering Detector, M.J. Wilcox and R. Saari-Nordhaus, *American Laboratory* **1998**, 30(17), 30-34.

Are ELSDs Coming Out of the Shadows? M. Felton, *Analytical Chemistry* **2002**, 631A-634A.

Comparison of an Evaporative Light Scattering Detector and a Chemiluminescent Nitrogen Detector for Analyzing Compounds Lacking a Sufficient UV Chromophore, M. Allgeier, M. Nussbaum and D. Risley, *LCGC* **2003**, 21 (4), 376-381.

Dual-mode ELSD: Optimum Performance for a Wide Range of Applications, A. Kuch and R. Saari-Nordhaus, *American Laboratory* **2001**, 33 (6) 61-64.

Evaporative Light Scattering Detection Solves Common HPLC Detection Problems, M.J. Wilcox, *International Labmate* **1998**, 23(6), 35-36.

Modified Laser Light Scattering Detector for Use in High Temperature Micro Liquid Chromatography, R. Trones, T. Andersen, I. Hunnes, and T. Greibrokk, *Journal of Chromatography A* **1998**, 814, 55-61.

Improved Modification of Laser Light Scattering Detector for Use in Packed Capillary High Temperature Liquid Chromatography, R.T. Andersen, T. Greibrokk, *Journal of High Resolution Chromatography* **1999**, 22(5), 283-286.

Improving Quantitative Measurements for the Evaporative Light Scattering Detector, B. Matthews, *Pfizer Poster Presentation, HPLC 2003*.

The Evaporative Light Scattering Detector, S. L. Hansen and W.E. Artz, *Inform* **1995**, 6(2), 170-176.

Detect Anything Your LC Separates, P.A. Asmus, *Research. & Dev.* **1993**, 2, 96-98.

Evaporative Light Scattering Detectors for HPLC, GPC, SEC, SFC - A Review, P.G. Bonnett, *International LabMate* **1990**, 15(5), 27-29.

Use of Light Scattering as a Detector Principle in Liquid Chromatography, A. Stolyhwo, H. Colin, G. Guiochon, *Journal of Chromatography* **1983**, 265, 1-18

A Light Scattering Detector for Liquid Chromatography, P.B. Stockwell, B.W. King, *American Laboratory* **1991**, 19-24.

Evaporative Analyzer as a Mass Detector for Liquid Chromatography, J.M. Charlesworth, *Analytical Chemistry* **1978**, 50(11), 1414-1420.

Study of the Qualitative and Quantitative Properties of the Light Scattering Detector, A. Stolyhwo, H. Colin, M. Martin, G. Guiochon, *Journal of Chromatography* **1984**, 288, 253-275.

Influence of Various Parameters on the Response Factors of the Evaporative Light Scattering Detector for a Number of Non-Volatile Compounds, G. Guiochon, A. Moysan, C. Holley, *Journal of Liquid Chromatography* **1988**, 11(12), 2547-2570.

Effects of the Nature of the Solvent and Solutes on the Response of a Light Scattering Detector, M. Righenza, *Journal of Liquid Chromatography* **1988**, 11(9 & 10), 1967-2004.

Effects of Wavelength of the Laser Beam on the Response of an Evaporative Light Scattering Detector, M. Righenza, *Journal of Liquid Chromatography* **1988**, 11(13), 2709-2729.

Carbohydrate Applications

An Alternative High Efficiency HPLC Assay for Glucosamine, M. Jacyno and M. Wilcox, *Alltech Oral Presentation, EAS 2003*.

Analysis of Carbohydrates using the Mass Detector, R. Macrae and J. Dick, *Journal of Chromatography* **1981**, 210, 138-145.

Analysis of Carbohydrates in Drinks by High Performance Liquid Chromatography with a Dynamically Modified Amino Column and Evaporative Light Scattering Detection, Y. Wei, M. Ding, *Journal of Chromatography A* **2000**, 904, 113-117.

Analysis of Trehalose in Transgenic Tobacco Extracts by High Performance Liquid Chromatography with Evaporative Light Scattering Detection, W. Yang and D. Ming-yu, *Chinese Journal of Chromatography* **2001**, 19(3).

Analysis of Carbohydrates by HPLC with a Dynamically Modified Amino Column and ELSD, Y. Wei, M. Ding, *Journal of Chromatography A* **2000**, 904, 113-117.

Ethanolamine as a Modifier for Analysis of Carbohydrates in Foods by HPLC and Evaporative Light Scattering Detection, Y. Wei, M. Ding, *Journal of Chromatography & Related Technologies* **2002**, 25(12) 1769-1778.

Evaporative Light Scattering Detection Methodology for Carbohydrate Analysis, C.S. Young, *Cereal Foods World* **2002**, Jan, Vol. 47, No.1.

High-Performance Liquid Chromatographic Determination of Mono- and Oligosaccharides in Vegetables with Evaporative Light-Scattering Detection and Refractive Index Detection, J.L. Hernandez, M.J. Gonzalez-Castro, I.N. Alba, and C. de la Cruz Garcia, *Journal of Chromatographic Science* **1998**, 36, 292-298.

Simultaneous HPLC Determination with Light Scattering Detection of Lactulose and Mannitol in Studies of Intestinal Permeability in Pediatrics, R. Marsilio, L. D'Antiga, L. Zancan, N. Dussini, F. Zacchello, *Clinical Chemistry* **1998**, 44:8 1685-1691.

Glyceride, Fatty Acid, Oil Applications

Brain Astrocyte Synthesis of Docosahexaenoic Acid from n-3 Fatty Acids is Limited at the Elongation of Docosapentaenoic Acid. S. Innis and R. Dyer, *Journal of Lipid Research* **2002**, 43, 1529-1536.

Determination of Nonvolatile Components of Heated Soybean Oils Separated with High-Efficiency Mixed-Bed Polystyrene/Divinylbenzene Columns. S.L. Abidi, I.H. Kim, and K.A. Rennick, *Journal of the American Oil Chemists' Society* **1999**, 76(8), 939-944.

Mechanistic Aspects of Fatty Acid Retention in Silver Ion Chromatography. B. Nikolova-Damyanova, W. W. Christie, B. Herslof, *Journal of Chromatography A* **1996**, 749, 47-54.

Non-Aqueous Reversed-Phase High-Performance Liquid Chromatography of Synthetic Triacylglycerols and Diacylglycerols. J-T Lin, C.L. Woodruff, and T.A. McKeon, *Journal of Chromatography A* **1997**, 782, 41-48.

Simulated Distillation of Heavy Oils Using an Evaporative Light Scattering Detector. D.M. Padlo and E.L. Kugler, *Energy & Fuels* **1996**, 10(5), 1031-1035.

Fast Monitoring of C₂₀ – C₁₆₀ Crude Oil Alkanes by Size-Exclusion Chromatography—Evaporative Light Scattering Detection Performed with Silica Columns. L. Carbognani, *Journal of Chromatography A* **1997**, 788, 63-73.

Analysis of Human Milk Triacylglycerols by High-Performance Liquid Chromatography with Light-Scattering Detection. S.M. Pons, A.I. Castellote Bargallo, and M.C. Lopez Sabater, *Journal of Chromatography A* **1998**, 823, 475-482.

Evaluation by High-Performance Liquid Chromatography of the Hydrolysis of Human Milk Triacylglycerides During Storage at Low Temperatures. S.M. Pons, A.I. Castellote Bargallo, and M.C. Lopez Sabater, *Journal of Chromatography A* **1998**, 823, 467-474.

Prediction of Relative Retention Times of Triacylglycerols in Non-Aqueous Reversed-Phase High-Performance Liquid Chromatography. J.-T. Lin, L.R. Snyder, and T.A. McKeon, *Journal of Chromatography A* **1998**, 808, 43-49.

Analysis of Lipoxygenase Kinetics by High-Performance Liquid Chromatography with a Polymer Column. A. Nunez and G.J. Piazza, *Lipids* **1995**, 30(2), 129-133.

Gradient Reversed-Phase High-Performance Liquid Chromatography of Saturated, Unsaturated and Oxygenated Free Fatty Acids and Their Methyl Esters. J.-T. Lin, T.A. McKeon, and A.E. Stafford, *Journal of Chromatography A* **1995**, 699, 85-91.

Comparative High-Performance Liquid Chromatographic Analyses of Cholesterol and Its Oxidation Products Using Diode-Array Ultraviolet and Laser Light-Scattering Detection. S. Kermasha, S. Kubow, and M. Goetghebeur, *Journal of Chromatography A* **1994**, 685, 229-235.

A Qualitative Method for Triglyceride Analysis by HPLC Using an ELSD. W.S. Letter, *Journal of Liquid Chromatography* **1993**, 16(1), 225-239.

Fatty Acid Composition of Human Milk Triglyceride Species. Possible Consequences for Optimal Structures of Infant Formula Triglycerides. C.H. Winter, E.B. Hoving, F.A.J. Muskier, *Journal of Chromatography* **1993**, 616, 9-24.

Analysis of Triglycerides in Oils and Fats by Liquid Chromatography with Laser Light-Scattering Detector. A. Stolywho, H. Colin, G. Guiochon, *Analytical Chemistry* **1985**, 57, 1342-1354.

Lipase G-Catalyzed Synthesis of Monoglycerides in Organic Solvent and Analysis by HPLC. C. Akoh, C. Cooper, C. Nwosu, *Journal of the American Oil Chemists' Society* **1992**, 69(9).

Determination of the Positional Distribution of Fatty Acids in Butter Fat Triacylglycerols. S. Kermasha, S. Kubow, M. Safari, A. Reid, *Journal of Chromatographic Science* **1993**, 70, 169-173.

A New Variety of Low Linolenic Rapeseed Oil; Characteristics and Room Odor Tests. A. Prevot, J.L. Perin, G. Laclaverie, P.H. Auge, J.L. Coustille, *Journal of the American Oil Chemists' Society* **1990**, 67(3), 161.

Analysis of Tocopherols and Phytosterols in Vegetable Oils by HPLC with Evaporative Light Scattering Detection. K. Warner, T.L. Mounts, *Journal of the American Oil Chemists' Society* **1990**, 67(11).

Analysis of Dimer Acids Using HPLC and the Evaporative Light Scattering Detector. Peter Bonnett, *Lipid Technology* **1992**, 96-97.

Comparison of Detectors for Size Exclusion Chromatography of Heavy Oil Related Samples. S. Coulombe, *Journal of Chromatographic Science* **1988**, 26: 1-6.

Lipid Applications

Determination of Phospholipids in NANOEDGE Itraconazole Formulation by HPLC and Evaporative Light Scattering Detection. L. Nair, M. Koberda, C. Rebbeck, and P. Papadopoulos, *Baxter Poster Presentation, AAPS* **2003**.

The ELSD as a Tool for the Lipid Chemist. R. Moreau, *USDA Poster Presentation, AOCs* **2000**.

Separation of Structured Lipids by High Performance Liquid Chromatography. K. Lee, K. Jones and T. Foglia, *Chromatographia* **2002**, 55 (3/4) 197-201.

HPLC of Grain Sorghum Wax Classes Highlighting Separations of Aldehydes from Wax Esters and Steryl Esters. K.T. Hwang, S. Cuppett, C. Weller, M. Hanna, *J. Sep. Sci.* **2002**, 25 619-623.

Estimation of Free Glycolipids in Wheat Flour by HPLC. J.B. Ohm, and O.K. Chung, *Cereal Chemistry* **1999**, 76(6), 873-876.

Efficient Method for (Lyso) Phospholipid Class Separation by High Performance Liquid Chromatography using an Evaporative Light-Scattering Detector. B. Sas, E. Peys, M. Helson, *Journal of Chromatography A* **1999**, 864, 179-182.

Fractionation of Soybean Phospholipids by High-Performance Liquid Chromatography with an Evaporative Light-Scattering Detector. T. Wang, E.G. Hammond, J.L. Cornette, and W.R. Fehr, *Journal of the American Oil Chemists' Society* **1999**, 76(11), 1313-1321.

Rapid Analysis of Oxidized Cholesterol Derivatives by High-Performance Chromatography Combined with Diode-Array Ultraviolet and Evaporative Laser Light-Scattering Detection. K. Osada, A. Ravandi, and A. Kuksis, *Journal of the American Oil Chemists' Society* **1999**, 76(7), 863-871.

Reversed-Phase Separations of Nitrogenous Phospholipids on an Octadecanoyl Poly (Vinyl Alcohol) Phase. S.L. Abidi and T.L. Mounts, *Journal of Chromatography A* **1997**, 773, 93-101.

Quantitative Analysis of Phosphatidylcholine Molecular Species using HPLC and Light Scattering Detection. Jos F.H.M. Brouwers, B.M. Gadella, L.M.G. van Golde, and A.G.M. Tielens, *Journal of Lipid Research* **1998**, 39, 1-10.

Quantitative High-Performance Liquid Chromatography Analysis of Plant Phospholipids and Glycolipids Using Light-Scattering Detection, G.A. Picchioni, A.E. Watada, and B.D. Whitaker, *Lipids* **1996**, 31(2), 217-221.

Separation of Synthetic Phosphatidylcholine Molecular Species by High-Performance Liquid Chromatography on a C₈ Column, J-T Lin, C.L. Woodruff, T.A. McKeon, and J.A. Singleton, *Journal of Chromatography A* **1998**, 824, 169-174.

New Procedures for Rapid Screening of Leaf Lipid Components from Arabidopsis, W.W. Christie, S. Gill, J. Nordback, Y. Itabashi, S. Sanda, and A.R. Slabas, *Phytochemical Analysis* **1998**, 9, 53-57.

Characterization of Rabbit Myocardial Phospholipase A₂ Activity Using Endogenous Phospholipid Substrates, O. Vesterqvist, C.A. Sargent, G.J. Grover, B. M. Warrack, G.C. DiDonato, and M.L. Ogletree, *Analytical Biochemistry* **1994**, 217, 210-219.

Separation of Lipid Classes from Plant Tissues by High Performance Liquid Chromatography on Chemically Bonded Stationary Phases, W.W. Christie and R.A. Urwin, *Journal of High Resolution Chromatography* **1995**, 18, 97-100.

Separation of Neutral Lipids by High-Performance Liquid Chromatography: Quantification by Ultraviolet, Light Scattering and Fluorescence Detection, E.J. Murphy, T.A. Rosenberger, and L.A. Horrocks, *Journal of Chromatography B* **1996**, 685, 9-14.

A Rapid Method for Phospholipid Separation by HPLC Using a Light-Scattering Detector, W.S. Letter, *Journal of Liquid Chromatography* **1992**, 15(2), 253-266.

High Performance Liquid Chromatography of Lipids for the Identification of Human Metabolic Disease, T.C. Markello, J.Gu, and W.A. Gahl, *Analytic Biochemist* **1991**, 198, 368-374.

Detection of HPLC Separation of Glycophospholipids: Part 1, J.V. Amari, P.R. Brown, J.G. Turcotte, *American Laboratory* **February 1992**, 23-29.

Optimization of Detection for HPLC Separations of Glycerophospholipids: Part 2, J.V. Amari, P.R. Brown, J.G. Turcotte, *American Laboratory* **March 1992**, 26-33.

HPLC Analysis of Phospholipids by Evaporative Light Scattering Detection, T.L. Mounts, S.L. Abidi, K.A. Rennick, *Journal of the American Oil Chemists' Society* **1992**, 69(5), 438-432.

High Performance Liquid Chromatography of Phosphatidic Acids and Related Polar Lipids, S.L. Abidi, *Journal of Chromatography* **1991**, 587, 193-203.

An Improved Method for the Identification and Quantitation of Biological Lipids by HPLC Using Laser Light Scattering Detection, B.S. Lutzke, J.M. Braugler, *Journal of Lipid Research* **1990**, 31, 2127-2130.

Rapid Separation and Quantification of Lipid Classes by High Performance Liquid Chromatography and Mass (Light Scattering) Detection, W.H. Christie, *Journal of Lipid Research* **1985**, 26: 507-512.

Analysis of Neutral Lipids and Glycerolysis Products from Olive Oil by Liquid Chromatography, B. Yang, J. Chen, *Journal of the American Oil Chemist Society* **1991**, 68(12).

High-Performance Liquid Chromatographic Analysis of Wheat Flour Lipids Using an Evaporative Light Scattering Detector, F. Conforti, C.H. Harris, J.T. Rinehart, *Journal of Chromatography* **1993**, 645, 83-88.

Determination of Cholesterol in Milk Fat by Reversed-Phase High Performance Liquid Chromatography and Evaporative Light Scattering Detection, G.A. Spanos, S.J. Schwartz, *LC/GC* **1992**, 10(10), 774-777.

Pharmaceutical Applications

Application of Evaporative Light Scattering Detection to the Characterization and Parallel Synthesis Libraries for Pharmaceutical Discovery, B. Hsu, E. Orton, S. Tang, R. Carlton, *Journal of Chromatography B* **1999**, 725 103-112.

Chiral Separation of *trans*-2-aminocyclohexanol hydrochloride with Evaporative Light Scattering Detection, S. Chen, H. Yuan, N. Grinberg, A. Dovletoglou, G. Bicker, *Merck Poster Presentation, HPLC 2002*.

High-Throughput Characterization of Combinatorial Libraries Generated by Parallel Synthesis, J.N. Kyranos and J.C. Hogan, *Analytical Chemistry* **1998**, 70(1), 389A-395A.

Quantitation of Combinatorial Libraries of Small Organic Molecules by Normal-Phase HPLC with Evaporative Light-Scattering Detection, C.E. Kibbey, *Molecular Diversity* **1996**, 1(4), 247-258.

An Alternative Method for the Determination of Chloride in Pharmaceutical Drug Substances Using HPLC and Evaporative Light-Scattering Detection, D.S. Risley, J.A. Peterson, K.L. Griffiths, and S. McCarthy, *LC/GC* **1996**, 14(12), 1040-1047.

A High-Performance Liquid Chromatography Method for the Quantitation of Impurities in an NMDA Antagonist Using Evaporative Light Scattering Detection, D.S. Risley and J.A. Peterson, *Journal of Liquid Chromatography* **1995**, 18(15), 3035-3048.

Trace Analysis of a Weak UV-Absorbing Pharmaceutical Compound in Swab Samples Using HPLC with Evaporative Light-Scattering Detection, D.S. Risley, K.F. Hostettler, and J.A. Peterson, *LC/GC* **1998**, 16(6), 562-568.

Rapid and Simple Determination of Insulin in Biological Fluids by High-Performance Liquid Chromatography with Light-Scattering Detection, R. Marsilio, M. Naturale, P. Manghi, G. Montini, L. Murer, M. Ros, G. Bisogno, *Journal of Chromatography B* **2000**, 744, 241-247.

Determination of Fumonisin B₁, B₂, B₃, and B₄ by High-Performance Liquid Chromatography with Evaporative Light-Scattering Detection, J.G. Wilkes, J.B. Sutherland, M.I. Churchwell, and A.J. Williams, *Journal of Chromatography A* **1995**, 695, 319-323.

High-Performance Liquid Chromatographic Analysis of Ginseng Saponins Using Evaporative Light Scattering Detection, M.K. Park, J.H. Park, S.B. Han, Y.G. Shin, and I.H. Park, *Journal of Chromatography A* **1996**, 736, 77-81.

A Facile Separation of Nonactin and Its Homologues, T. Herlt, *Journal of Liquid Chromatography and Related Technologies* **1997**, 20(8), 1295-1300.

The Evaporative Light Scattering Detector: Some Applications in Pharmaceutical Analysis, M. Kohler, W. Haerdi, P. Christen and J. Veuthey, *Trends in Analytical Chemistry* **1997**, 16(8), 475-484.

Evaporative Light Scattering Detector: A New Tool for Screening Purposes, S. Cardenas, M. Gallego and M. Valcarcel, *Analytica Chimica Acta* **1999**, 403, 1-5.

Determination of Polysorbate 80 in Parenteral Formulations by High Performance Liquid Chromatography and Evaporative Light Scattering Detection, L. Nair, N. Stephens, S. Vincent, N. Raghavan and P. Sand, *Journal of Chromatography A* **2003**, 1012, 81-86.

Polymer and Surfactant Applications

Universal Detection and Quantitation of Surfactants by High-Performance Liquid Chromatography by Means of the Evaporative Light-Scattering Detector, G.R. Bear, *Journal of Chromatography* **1988**, 459, 91-107.

Chemical Characterization of Cellulose Acetate by Non-Exclusion Liquid Chromatography, T.R. Floyd, *Journal of Chromatography* **1993**, 629, 243-254.

Acrylic Block Copolymer Analysis by Adsorption Chromatography with ELSD, B.L. Neff, H.J. Spinelli, *Journal of Applied Polymer Science* **1991**, 42, 595-600.

Use of an Evaporative Light Scattering Detector in Reversed-Phase High-Performance Liquid Chromatography of Oligomeric Surfactants, Y. Mengerink, H.C. De Man, S.J. Van Der Wal, *Journal of Chromatography* **1991**, 552, 593-604.

Determination of Polyethylene Glycol in Low-density Polyethylene by Large Volume Injection Temperature Gradient Packed Capillary Liquid Chromatography, I. Skuland, T. Anderson, R. Trones, R. Eriksen and T. Greibrokk, *Journal of Chromatography A* **2003**, 1011, 31-36.

SFC Applications

Applications of Packed-Column SFC Using Light-Scattering Detection, A.J. Berry, E.D. Ramsey, M. Newby and D.E. Games, *Journal of Chromatographic Science* **1996**, 34, 245-253.

Evaporative Light Scattering Detection for Supercritical Fluid Chromatography, J.T.B. Strode and L.T. Taylor, *Journal of Chromatographic Science* **1996**, 34, 261-271.

Supercritical Fluid Chromatography of Ginkgolides A, B, C and J and Bilobalide, J.T.B. Strode, L.T. Taylor, and T.A. van Beek, *Journal of Chromatography A* **1996**, 738, 115-122.

Method Development for the Separation of Phospholipids by Subcritical Fluid Chromatography, P.R. Eckard, L.T. Taylor, and G.C. Slack, *Journal of Chromatography A* **1998**, 826, 241-247.

Analysis of Fatty Acid Methyl Esters by Using Supercritical Fluid Chromatography with Mass Evaporative Light Scattering Detection, S. Cocks, R. Smith, *Analytical Proceedings* **1991**, 28, 11-28.

Simultaneous Resolution and Detection of a Drug Substance, Impurities, and Counter Ion Using a Mixed-Mode HPLC Column with Evaporative Light Scattering Detection, M.D. Lantz, D.S. Risley, and J.A. Peterson, *Journal of Liquid Chromatography & Related Technologies* **1997**, 20(9), 1409-1422.

Packed Capillary Supercritical Fluid Chromatography with Mixed Mobile Phases and Light Scattering Detection, S. Hoffman, T. Greibrokk, *Journal of Microcolumn Separation* **1989**, 1(1), 35-40.

Supercritical Fluid Chromatography/Light-Scattering Detector: A Promising Coupling for Polar Compound Analysis with Packed Columns, P. Carraud, et al., *Journal of Chromatographic Science* **1987**, 25, 395-398.

Advances in Semi Micro Packed Column SFC and its Hyphenation, M. Takeuchi, S. Toshinori, *Journal of Chromatography Library Series* **1992**, 53.

Laser Light Scattering Detection for High Speed Counter Current Chromatography, D.E. Schaufelberger, T.G. McCloud, J.A. Beutler, *Journal of Chromatography* **1991**, 538, 87-90.

Miscellaneous Applications

Determination of the Mass Extractable in Organic Solvents by Light Scattering Detection, K.S. Hammond, J. Shatkin, B.P. Leaderer, *Applied Occupational Environmental Hygiene* **1992**, 7(1), 49-54.

Chiral Separations of Polar Compounds by Hydrophilic Interaction Chromatography with Evaporative Light Scattering Detection, D. Risley, M. Strege, *Anal. Chem.* **2000**, 72, 1736-1739.

Determination of Decyldimethyl Ammonium Chloride on Wood Surfaces by HPLC with Evaporative Light Scattering Detection, C.R. Daniels, *Journal of Chromatographic Science* **1992**, 30, 497-499.

Newer Method for the Characterization of Higher Molecular Mass Coal Derivatives, K.D. Bartle, *Erdol und Kohle - Erdgas - Petrochemie Vereinigt mit Brennstoff* **1983**, 36(1).

Nutraceutical Applications

Determination of the Major Isosteroidal Alkaloids in Bulbs of Fritillaria by High Performance Liquid Chromatography Coupled with Evaporative Light Scattering Detection, S. Li, G. Lin, S. Chan, P. Li, *Journal of Chromatography A* **2001**, 909 207-214.

Analysis of Terpene Compounds in Cimicifuga Foetida L. by Reversed-Phase High Performance Liquid Chromatography with Evaporative Light Scattering Detection, L. Kong, X. Li, H. Wang, X. Mao, Q. Zhang, J. Ni, *Journal of Chromatography A* **2001**, 936 111-118.

High-throughput Analysis of Natural Product Compound Libraries by Parallel LC-MS Evaporative Light Scattering Detection, P. Cremin and L. Zeng, *Analytical Chemistry* **2002**, 74 (21), 5492-5500.

Chemical Analysis of Ginkgo Biloba Leaves and Extracts, T. Beek, *Journal of Chromatography A* **2002**, 967, 21-55.
