

La-Pha-Pack PP Vial Racks

PP Vials Racks for standard 1.5ml and 4ml sample vials

La-Pha-Pack PP Vials Racks support a convenient and safe handling of sample vials.

- Polypropylene Vial Racks are more simple in design and thus also considerably cheaper in comparison to the La-Pha-Pack Acrylic Vial Racks
- They fulfill the main purpose of a safe standing position for the vials in the rack and therefore represent a more economically advantageous alternative for a lot of labs with a life time being well-balanced in relation to their price.
- They are stackable and the edge marking helps to clearly identify the sample.
- Chemically resistant and fairly robust
