

RECIPE

ClinMass® complete kit

Trace Elements in human plasma and serum

RECIPE your premier partner and first choice for clinical analytics of trace elements by ICP-MS/MS

Ag, Al, As, Au, Ba, Be, Bi, Cd, Co, Cr, Cu, Fe, Hg, I, Li, Mg, Mn, Mo, Ni, Pd, Pt, Sb, Se, Sn, Ti, Tl, V, Zn

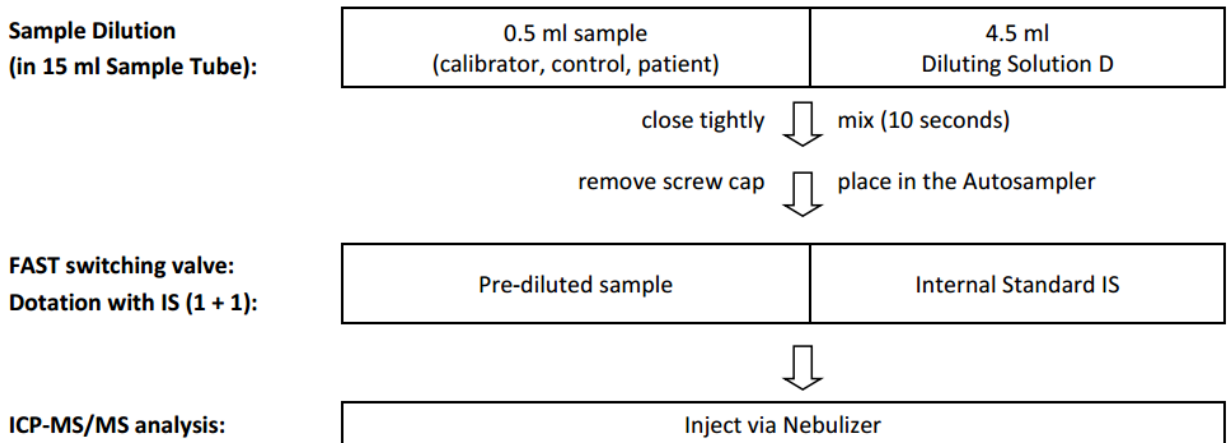

CE - IVDR ready

Order no.	Component
MS50000	ClinMass® Complete Kit for Trace Elements in Plasma / Serum
	Components (order no. MS50000)
MS50005	Autosampler Washing Solution
MS50007	Fast Carrier Solution
MS50012	Internal Standard IS
9950	Serum Calibrator Set, lyophil., Level 1-4
MS50020	Sample Preparation Vials
MS50021	Diluting Solution D
	ClinChek® Controls:
8880	Serum Control, lyophil., Level I
8881	Serum Control, lyophil., Level II
8882	Serum Control, lyophil., Level I, II
8883	Plasma Control, lyophil., Level I
8884	Plasma Control, lyophil., Level II
8885	Plasma Control, lyophil., Level I, II

ClinMass® complete kit

Trace Elements in human plasma and serum

- + First commercial IVD kit for ICP-MS
- + Validated method for up to 28 trace elements in 1 run
- + Multi-element and multi-level controls and calibrators

RECIPE Chemicals and Instruments, a pioneer and one of the global leader in kit development for HPLC and LC-MS/MS systems, offers the first ClinMass IVD complete kit for trace elements in human plasma and serum by ICP-MS/MS
