Application Note 004

Publications citing Markes' TD products

Introduction

This Application Note is a compilation of publications and selected presentations that cite Markes' thermal desorption (TD) products. The aim is to allow the reader to quickly identify relevant citations in the literature, as well as to demonstrate the versatility of Markes' equipment across the whole range of VOC analytical applications.

Where available, links to the original sources are provided; if none is given, please contact us (enquiries@markes.com) to check on availability.

Within each subsection, citations are presented in reverse chronological order, and the products covered appear in bold type at the end of each entry. These products are briefly described below – to visit the relevant webpage, please click on the product name.

Air Server	For canisters and on-line sampling
Bio-VOC	For non-invasive breath monitoring
CIA 8 and CIA *Advantage*	Automated analysers for canisters
µ-CTE	The Micro-Chamber/Thermal Extractor
MTS-32	Multi-tube sampler
TC-20	Multi-tube conditioner
TD-100	Automated 100-tube thermal desorber
TT24-7	For continuous on-line monitoring
TubeTAG	Sorbent tube tagging and tracking
ULTRA	100-Tube autosampler
UNITY	Universal TD platform for single tubes
VOC-Mole	For below-ground VOC monitoring.
